# Back Painted Glass

“***Glass paint technology*** has evolved to meet the ever increasing demand for back painted glass products.”

This versatile glass product is used predominantly applications and is equally suited to a residential **kitchen splashback** application as it is to cladding the walls within a busy office reception, wetroom or shower enclosure.

# Colour Options - over 18 000

PAR Glass London LTD offers over 18 000 colours of back painted glass - among them is the **RAL** colour option as well as **Dulux, Farrow & Ball, British Standards** and **Pantone**.

We predominately use a **low iron glass** which is colourless to allow the true back painted colour to show through.

We can also produce toughened glass splashbacks up 4m long without splits.

Below are presented the most common colours from every tone and shade:

# 3-5 Working Days Turnaround

**Glass splashbacks** are highly reflective and allow an option to add a bright burst of colour or to blend a base colour into a room such as white, grey or cream. We would always recommend choosing a complimentary colour rather than colour matching to other painted areas within a room.

## WHITE

RAL 1013	Oyster White
RAL 9001	Cream White
RAL 9003	Signal White
RAL 9010	Pure White

## YELLOW

# T-Shape Splashback Option

In some project scenarios, often happens that the glass goes under the hob and the kitchen cabinets in a shape of so called upside down 'T' letter. We offer a special splitting option in a cutting process which allows the panels to be installed in a more safety, compataible and efficient way.

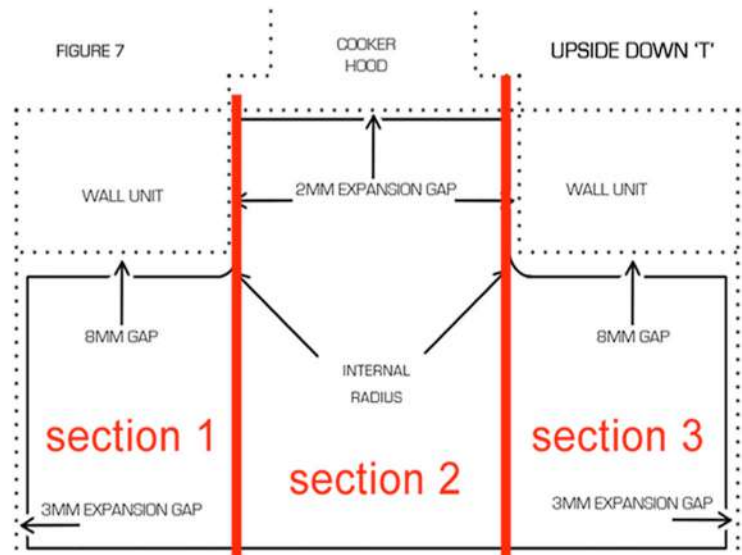

This splitting technique also saves a crucial time in the production and definately provides less risk of loosing the glass in toughening process.

## Upside down T-Shape Splashback in one piece

PAR proffesional glaziers would still be more than happy to follow individual customer instructions and produce upside down 'T' shape panel in a one section. However, as we have a vital, deep experience in a variety of occasions, we do strongly recommend you to take a moment of reading this information and carefully consider this option when thinking about fitting the glass under cooker hob and cabinets.

The entire process of splitting gives you an opportunity to get your glass installed in a much faster time than a one section piece and we can assure you the panels would still present perfectly and beautifully within the kitchen area.
