PAR Glass London Ltd specialises in both domestic and commercial glazing, covering everything you could possibly imagine in this exciting and constantly developing industry.

We are proud to have developed into a company which manufactures its own glass, ensuring rapid turnaround times for all our domestic and commercial clients. With over 15 years in the industry we have enjoyed taking part in thousands of projects. These range from one to one domestic installations to 1500 apartment commercial contract.

It is with this comprehensive experience, we feel poised to undertake any project no matter how complex and challenging.

Whatever you are looking for, the PAR Glass Team is there to offer support and advice on your journey from product choice to installation. Our friendly, professional team is on hand to help you with design decisions, offer feedback on colours and quality, discuss technical issues and installation process. We take our work seriously; we want you to be confident in the choices you make and delighted with the results.

Your target is our aim!

For your viewing pleasure, throughout this brochure, we have compiled a comprehensive portfolio of the work we do. So enjoy all of the features provided and remember, we are always happy to discuss your project over the phone.

□ Our Products

□ Glass Splashbacks

Back Painted Glass

Glass paint technology has evolved to meet the ever increasing demand for back painted glass products.

This versatile glass product is used predominantly applications and is equally suited to a residential **kitchen splashback** application as it is to cladding the walls within a busy office reception, wetroom or shower enclosure.

020 8998 9901

sales@parglass.co.uk

Colour Options - over 18 000

PAR Glass London LTD offers over 18 000 colours of back painted glass - among them is the **RAL** colour option as well as **Dulux**, **Farrow & Ball**, **British Standards** and **Pantone**.

We predominately use a **low iron glass** which is colourless to allow the true back painted colour to show through.

We can also produce toughened glass splashbacks up 4m long without splits.

Below are presented the most common colours from every tone and shade:

3-5 Working Days Turnaround

Glass splashbacks are highly reflective and allow an option to add a bright burst of colour or to blend a base colour into a room such as white, grey or cream. We would always recommend choosing a complimentary colour rather than colour matching to other painted areas within a room.

WHITE		YELLOW		BROWN		LILAC	
RAL 1013	Cyclist White	RAL 1014	Sulphur Yellow	RAL 8001	Golden Brown	RAL 4001	Red Lilac
RAL 9001	Cream White	RAL 1018	Disc Yellow	RAL 8012	Red Brown	RAL 4007	Purple Violet
RAL 9003	Signal White	RAL 1023	Traffic Yellow			RAL 4010	Intergalactic
RAL 9010	Pure White	RAL 1036	Pink Gold				
GREY		GREEN		BLUE		RED	
RAL 7003	Mass Grey	RAL 6002	Leaf Green	RAL 5001	Green Blue	RAL 2002	Vibrant Red

RAL 7016	Antique Grey	RAL 6005	Moss Green	RAL 5003	Sapphire Blue	RAL 3000	Purple Red
RAL 7024	Grape Grey	RAL 6018	Yellow Green	RAL 5004	Black Blue	RAL 3001	Signal Red
RAL 7031	Black Grey	RAL 6019	Pastel Green	RAL 5012	Light Blue	RAL 3003	Very Red
RAL 7044	Slit Grey	RAL 6021	Pale Green	RAL 5018	Turquoise Blue	RAL 3020	Traffic Red
RAL 9007	Grey Aluminium						
RAL 9006	White Aluminium						
RAL 9017	Traffic Black						

RAL COLOUR SAMPLES PALETTE

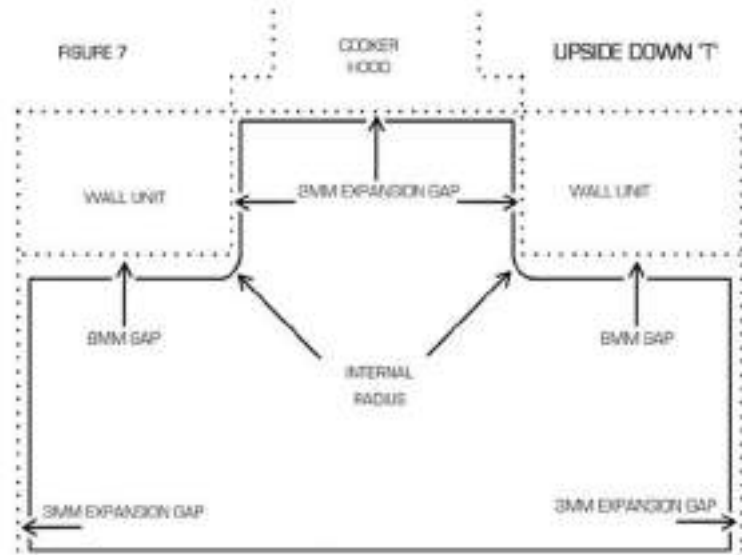

T-Shape Splashback Option

In some project scenarios, often happens that the glass goes under the hob and the kitchen cabinets in a shape of so called upside down 'T' letter. We offer a special splitting option in a cutting process which allows the panels to be installed in a more safety, compataible and efficient way.

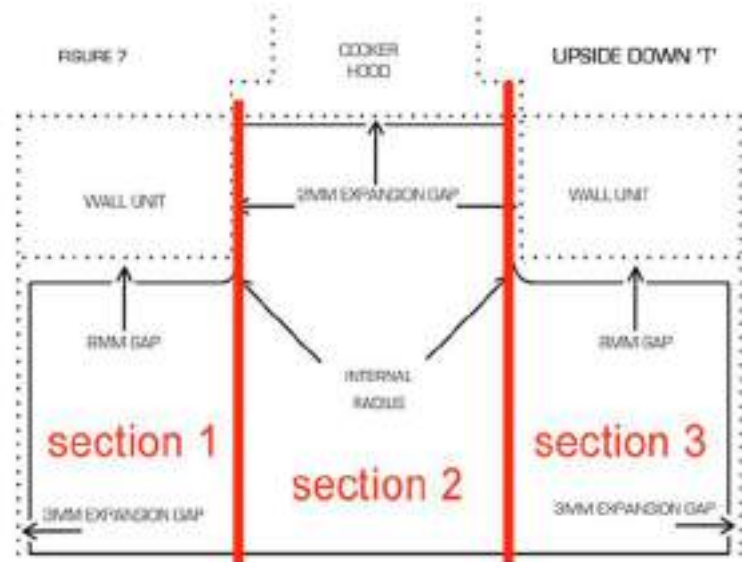

This splitting technique also saves a crucial time in the production and definately provides less risk of loosing the glass in toughening process.

Upside down T-Shape Splashback in one piece

PAR professional glaziers would still be more than happy to follow individual customer instructions and produce upside down 'T' shape panel in a one section. However, as we have a vital, deep experience in a variety of occasions, we do strongly recommend you to take a moment of reading this information and carefully consider this option when thinking about fitting the glass under cooker hob and cabinets.

The entire process of splitting gives you an opportunity to get your glass installed in a much faster time than a one section piece and we can assure you the panels would still present perfectly and beautifully within the kitchen area.

sales@parglass.co.uk

When a designer is looking to retain views and reflect light inwards while providing security and safety for those using staircases, balconies and terraces, a **glass balustrade** provides a stylish and contemporary solution.

Blending with most interior and exterior finishes and adding a subtle component to the elevation. **PAR Glass London Ltd** offers toughened glass in a range of thicknesses, to be used externally with a mechanically fixed handrail and internally on mezzanine areas, **staircases and landings**.

This glass is bespoke and made to your required thickness, using toughened glass and a resin interlayer between glass panels.

□ Mirrors

Bespoke Mirrors

Mirrors can be utilised across a vast array of applications including walls, partitions, doors, displays, ceilings, cupboards, wardrobes and other furniture. Special safety film backing can be applied to protect against possible injury resulting from breakage.

This makes it the ideal choice for applications anywhere in the home where there is a greater risk of accidental damage e.g. doors, wardrobes and children's rooms.

□ Shower Screens

Shower Screens

Frameless glass shower doors and enclosures are now a typical feature within many hotels and leisure centres, but also work equally well within domestic bathroom applications.

An all glass shower enclosure removes the design limitations present in a typical framed system. Visible ironmongery is reduced to an absolute minimum and by using clear acrylic seals you are left with a totally frameless glass enclosure/screen.

020 8998 9901

sales@parglass.co.uk

Where possible, the channel required for a fixed screen would be set within the wall covering, always contact us in the stages of design to achieve the most frameless finish possible.

A **frameless enclosure** lends itself particularly well to special applications, and systems can be designed to suit virtually any size of shower tray or bath.

020 8998 9901

sales@parglass.co.uk

PAR Glass London Ltd offers a bespoke service providing numerous options for finish and design.

□ Glass Doors

Glass Doors

020 8998 9901

sales@parglass.co.uk

As a continuation of the overall design or purely as a signature element of a building, **glass doors** can be used effectively both for the interior and exterior applications.

They allow to pass through whilst allowing privacy if required, creating exciting yet functional environments.

020 8998 9901
sales@parglass.co.uk

All **glass doors** are bespoke and frameless.

PAR Glass London Ltd offers a wide range of glass fittings in a variety of styles and finishes but also with options such as automatic closing, hold open and much more.

□ Glass Partitions

Glass Partitions

Frameless **glass partitions** are a great way to create a beautiful office environment.

A full length frameless glazed partition system gives your office a spacious feel allowing the maximum amount of light through.

This stylish glass partitioning provides an attractive 'wow' factor to your workspaces.

Glass gives your partition walls a high-quality appearance and creates light, open rooms. Its soundproofing properties allow you to work undisturbed and in peace - ideal conditions for offices.

Manifestation Effect

020 8998 9901

sales@parglass.co.uk

Glass manifestation is necessary on glass of certain size in certain locations, with the primary function to make the glass visible. Large expanses of clear glass can often be difficult to detect, making them potentially hazardous.

Manifestation is usually placed at strategic locations on the glass, the contrast between the manifestation and the glazing making it easy to spot, preventing potential accidents.

Manifestation effect is traditionally created from a frosted film. Frostbrite film provides a classic sandblasted, acid-etched effect, delivering a contemporary, stylish manifestation solution.

□ Types of Glass

Optifloat Clear

PAR Glass London Ltd specialises in innovative glass products. Our service aims to bring modern minimalist designs into the home and commercial spaces. We can offer a full design service or produce individual pieces to suit each project.

Optifloat TM Clear Description

All manufacture of Optifloat TM Clear meets EN 572 part 2 1995, the exacting European standard.

We have been constantly developing and improving the process to produce glass that is both of the highest quality and available in a wide range of sizes and thicknesses - allowing it to be used in virtually limitless applications.

Optifloat TM benefits you, while minimising damage to the environment. It is totally recyclable and reflects the environmental stance PAR Glass London LTD as a company.

Product Features:

- Specially tinted Optifloat saves man-made energy, controls solar energy and gives a striking visual effect.
- In both homes and the workplace, Optifloat offers a practical, stylish alternative to traditional materials in screens, partitions and furniture.
- Optifloat TN Clear gives designers the freedom to create attractive modern environments that are also economical and easy to maintain.

Optiwhite

Optiwhite TM Description

Optiwhite TM is an extra-clear, low-iron float glass; it is practically colourless, and the green inherent to other glasses is not present.

It is therefore ideal for use where glass edges are visible or where a neutral colour is desired. As its transmission is 1% and 6% higher than clear float glass in 3mm and 15mm thickness respectively, it is perfect for applications where transparency and purity of colour are desired.

Available in thicknesses of between 2mm and 19mm (the widest range on the market), Optiwhite TM provides increased design flexibility and, when combined with other products, it can offer additional benefits such as thermal insulation or self-cleaning

Product Features:

- High light transmission for outstanding visual clarity when an unrestricted view is required.
- Purity of colour with minimum colour cast when viewing through the glass, ensuring a truer representation of the designer's vision.
- Flexibility of application; can be toughened or laminated for safety and security.

[□ Our Services](#)

020 8998 9901
sales@parglass.co.uk

PAR Glass London London Ltd provides professional measure and installation service.

Using special measuring equipment, our team takes incredibly precise measurements of the installation site. They can also bring samples to view, as well as providing advice and guidance on how to place the glass around the kitchen, bathroom or any other area where the glass goes. We offer impressive 3-5 millimetre tolerance in fitting your glass panels.

Once the glass is manufactured, processed through our quality check system, an installation date will be agreed. Our team regularly has several installations every day, with **over 1500 projects completed** in the last years. Installations usually take only a few hours maximum to complete.
